Vertical Machining Center VM Series

VM1160SN

Fortune Pacific Vertical Machine Center

Decision guide for NEWAY VMC lines across 33 language markets.
Official series taxonomy inherited — no regrouping.

Neway’s diverse VMC models meet the world class processing needs of different industries. The uniqueness of many of their zero-defect manufacturing process has won the trust and praise of many repeat customers worldwide.

- Finite Element Analysis designed castings provide high rigidity, the solid base and extremely rigid column ensure the stability of machine while processing parts; praise of many repeat customers worldwide.
- Large span, widened and hardened thick guide way mounting surface guarantee the excellent machine accuracy over the long term;
- The three-axis ball screw adopt a pre-tensioned process to ensure good positioning and repeatability accuracy while eliminating backlash;
- The whole series VMC provides a convenient one-button reset function for more convenient problem solving like tool magazine recovery. Some models adopt the rapid tool change system, which greatly reduces the tool change time;
- Some series have four guideways on the Y-axis, which have larger loading capacity. It can be equipped with a gearbox to improve the cutting torque at lower rpm;
- Vibration test and dynamic balance control tests minimize harmonics while ensuring assembly accuracy and motion performance. This improves the parts surface finishing and extends the working life of the machine.

CONTENTS

- 01-08 Neway VMC features
- 09-14 High-efficiency vertical machining center
- 15-22 High-speed Vertical Machining Center
- 23-26 Built-in Motor Spindle Machining Center
- 27-30 Heavy-duty Vertical Machining Center
- 31-33 Vertical machining center with movable column
- 34-36 Portal Vertical Machine Center
- 37-45 Five-axis Vertical Machining Centerr
- 46-48 High precision portal vertical machining center
- 49-58 Industry Specific Machine Center
- 59-60 Control System
- 61 Neway Quality Control
Manufacturing and Measurement
- 62 Auto machining lines
- 63 Optional configurations
